

Online Maker Manager Course 2.0

Overview & Synopsis

Online Maker Manager 2.0 is a self-paced professional development program designed to take educators' makerspace leadership skills to the next level by deepening strategic thinking, strengthening inclusive practices, and expanding capacity to lead impactful maker learning experiences. This advanced course builds on foundational makerspace leadership concepts while adding tools, strategies, and technologies that support confident facilitation of creative, equitable, and student-centered environments.

The course is delivered online in an asynchronous format, allowing educators to complete modules at their own pace and integrate learning into their schedules. Throughout the experience, participants engage in hands-on projects, access expert-led training modules, and receive practical resources they can use immediately in their classrooms or makerspaces.

What's Included in the Course

Participants in Maker Manager 2.0 receive a comprehensive learning package that supports advanced makerspace leadership:

- ✓ **Self-paced online modules** with in-depth content on advanced maker strategies, inclusive culture building, and implementation best practices.
- ✓ **Hands-on learning materials**, including a micro:bit with accessories shipped directly to participants to apply technology in maker learning.
- ✓ **Engaging projects and practical exercises** that reinforce skills while exploring advanced tools and instructional models.
- ✓ **Access to resources and guides** designed to help expand makerspace use across classrooms / community settings.
- ✓ **Maker Manager 2.0 Certification** awarded upon successful course completion.
- ✓ **Professional Growth Points** available for continuing education credit.

Who This Program Is For

Maker Manager 2.0 is ideal for educators and makerspace leaders who:

- ✓ **Have foundational experience** with maker education or have completed earlier makerspace courses.
- ✓ **Want to strengthen inclusive practices, expand technology integration, and lead makerspaces** with confident strategic direction.
- ✓ **Are working to scale maker learning and increase engagement** across diverse student populations.

Participant Outcomes

Deepen Makerspace Leadership

- Demonstrate advanced understanding of makerspace leadership principles that go beyond foundational management.
- Facilitate inclusive, equitable learning environments where all students can engage with hands-on making.

Expand Strategic Maker Practices

- Integrate advanced technologies such as micro:bit into makerspace projects and curriculum design.
- Apply strategies to sustain maker communities and grow participation across classrooms and grade levels.

Strengthen Culture and Community Engagement

- Build stronger connections between makerspace activities and broader school or community goals.
- Lead initiatives that champion student creativity, collaboration, and problem-solving.
- Access to a cohort of maker managers for ongoing support.

Earn Advanced Credentials

- Receive the Maker Manager 2.0 Certification, validating advanced makerspace leadership skills.
- Collect 9 Professional Growth Points to support professional development goals.
