

# Online Maker Manager Course

## Program Overview

The Online Maker Manager Course from 1st Maker Space is a flexible, self-paced professional development program that prepares educators to lead, manage, and sustain effective makerspaces in classrooms and school communities.

This course blends theory, best practices, and hands-on making to build confidence and competence in makerspace leadership – all delivered online with real-world application.

**Note:** Course format is online and flexible, making it well-suited for educators with varied schedules.

## What's Included in the Course

Participants receive a suite of resources and training materials designed to support hands-on skills and makerspace leadership:

- ✓ **Self-paced, online learning modules** covering makerspace management, STEM best practices, and implementation strategies.
- ✓ **Hands-on STEM kits shipped to participants** (e.g., Bristlebots and Paper Circuit kits – check specific offerings).
- ✓ **Feedback provided by 1st Maker Space Educational Services team** through the LMS platform.
- ✓ **Digital copy of Invent to Learn** – a foundational book on maker education and inquiry-based learning.
- ✓ **Maker Manager Certification** upon completion of all course requirements.
- ✓ **Professional Growth Points available** for professional development credit.

## Who This Program Is For

The online Maker Manager Course is ideal for educators, instructional leaders, after-school coordinators, and STEM advocates who:

- ✓ **Want practical tools to lead and sustain makerspaces.**
- ✓ **Need flexible professional development that fits around teaching schedules.**
- ✓ **Seek to enhance hands-on learning and creative problem-solving in their learning environments.**

## Participant Outcomes

### Lead with Confidence in Makerspace Education

- Demonstrate understanding of core maker education principles and how to translate these into student learning experiences.
- Apply practical strategies for organizing and managing makerspace environments.

### Integrate Hands-On Learning & Best Practices

- Use STEM and project-based approaches to engage learners across subjects.
- Implement safety, organization, and sustainability practices in makerspace settings.

### Build and Sustain a Thriving Makerspace

- Plan a makerspace implementation strategy tailored to their school or community.
- Identify stakeholder needs and communicate value to administrators, teachers, and families.
- Access to a cohort of other maker managers for ongoing support

### Earn Recognized Credentials

- Receive a Maker Manager Certification validating expertise in makerspace leadership.
- Gain Professional Growth Points for continued educator development.
